

Plane Mirrors Worksheet

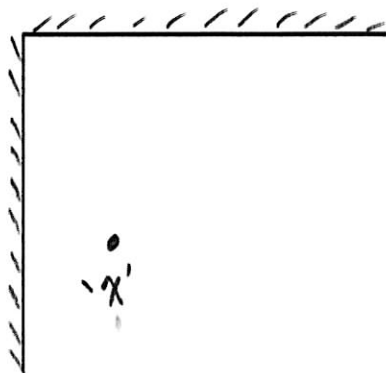

Find the images of x, y, z

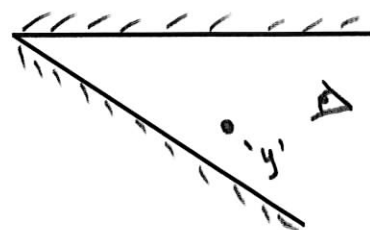

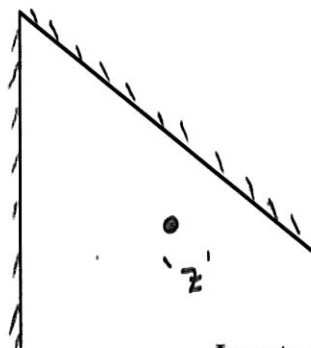

Draw the path of the rays as they hit the mirror

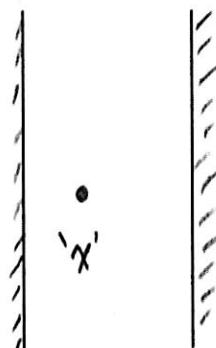

Finding images in multiple mirrors:

Find the images in the following mirror set-ups. Draw how the eye sees the last image where applicable. If more than one 'last image' then choose one of the images.

Locate as many images of point 'x' as possible:

Draw how the eye can see the last image possible on the left:
